The SEED Center Summer Program serves children and adolescents with special needs, including: Autism Spectrum Disorders (including Asperger's Syndrome and PDD-NOS), Attention Deficit Hyperactivity Disorders, Learning Disabilities, Speech and Language Delays and Emotional/Behavioral Disorders.

The focus of The SEED Center Summer Program is the development of social and emotional reciprocity and enhancement of self-esteem. The program offers support, structure, excellent professional supervision and social skills development. The SEED Center Summer Program provides a safe environment for children with special needs who are not able to meet the socialization demands of typical local day camps. The program is designed to help children and adolescents develop social skills, build friendships, heighten communication skills, encourage interpersonal relationships and build self-esteem.

The program provides uniquely designed recreational and creative activities specifically created to meet the needs of its campers. Your child or adolescent will receive personalized attention in small groups with low child-to-adult ratios. The SEED Center Summer Program provides short, structured social and recreational activities throughout the day including: drama, science experiments, storytelling, music, cooking, crafts, computers and i-Pad, group games and social skill-building groups, and trips to fun-filled places.

Prior to enrollment, every new applicant must make an appointment for a screening. This enables us to determine the most suitable placement for your child and to ensure the most valuable summer experience. Partial day, full day and customized options are available.
