### **A Summer of Science Adventures — Just for the FUN of it!**

Enroll your child in a summer of endless science fun. Located high atop Talcott Mountain, this day program is especially designed for intellectually excited girls and boys. Your child will follow an individualized program developed by educators and scientists at the Talcott Mountain Science Center (TMSC).

Children in grades K-9 can attend for the summer of just by the week. The season runs from the last full week of June to the second week of August.

Imagine a place...

...where your child will experience the world of science and technology with other curious and creative girls and boys.

...that challenges young minds with creative problems.

...that makes learning fun and exciting.

Talcott Mountain is also a place for the musical, the artistic, the scientific and the inquisitive. A place to make new friends, equipped with instruments of discovery. A place where everyone cares about children and where your child will thrive! Your child will explore and create in a hands-on program developed by educators and scientists at TMSC.

Age-appropriate sessions include: Robotics, Computer Game Making Astronomy, Rocketry, Connecticut Wildlife, Magic & Science Rocks and Minerals, CSI, Girls Rock!, Green Energy Arts and Crafts, Computer Graphics and Animation, Wild Weather Web Page Design, Pirate Science, Electronics, Geocaching and TV Production.
