Curious and creative middle school girls can explore a summer of learning and fun through engaging academic and artistic programs. Campers discover new passions, expand their knowledge and meet new friends, while living and learning on a quaint New England campus.

Westover School Summer Programs offer experiences in science, technology, engineering and math (STEM), English language learning (ELL), and visual and performing arts, while incorporating recreational, athletic and other creative activities. Programs empower girls to explore new subjects, participate in leadership opportunities and expand their community.

Summer programs are for rising 6th through rising 9th graders, with sessions from July 7 through August 3. They offer boarding or day camp options. Choose from:

STEM — *Environmental Studies, Forensic Lab, Geometry in Art and Architecture, SSAT Prep Course, STEM/Women in Science & Engineering, and Finding Your Voice Through TED-Ed*

Visual Arts — *Ceramics, Photography, Basic Drawing from Observation, and Intro to Oil Painting*

Performing Arts — *Ballet & Modern Dance, Contemporary & Musical Theater, and Theater*

English Language Learning (ELL)

For more information, contact Assistant Director of Summer Programs, Emily Slomski, at 203-577-4500 or eslomski@westoverschool.org.
