Achieve Beyond is a Birth to Three autism-specific early intervention program which offers a variety of services and assessments for children on the autism spectrum. Achieve Beyond's parent company, Bilinguals Inc. has been providing early intervention services since 1995. Services incorporate the principles of Applied Behavior Analysis (ABA), an evidence based approach. Our goal is for each child to be successful in attaining his or her academic, social and adaptive goals by creating a program designed to meet their unique needs.

Many experts believe that children with autism are less likely to learn from the everyday environment. ABA methodologies attempt to fill this gap by providing teaching tools that focus on simplified instructional steps and consistent reinforcement. Research suggests improved outcomes when intervention begins early.

If you suspect your child has autism, all members of our staff will be available to guide you through the evaluation process. We have trained professionals who can administer the ADOS, an educational assessment tool. Based on the results of the assessment, your child may qualify to receive services.

Services are provided by CT licensed and/or certified professionals and Early Intervention Associates. They are provided in natural environments that include families' homes, child care settings and other community locations as authorized in the child's service plan. Services are given in English or by bilingual Spanish therapists.

Services offered by Achieve Beyond include: ABA services, special education, BCBA, speech therapy, social work, occupational therapy, physical therapy, psychological and service coordination.
